Improving Care for Veterans Facing Illness and Death

HFA's 2013 *Living With Grief*® program, *Improving Care for Veterans Facing Illness and Death*, will assist end-of-life care provider organizations and health and human service professionals in enhancing their sensitivities and understanding of veterans and to provide professionals with new interventions to better serve dying veterans and their families. Attention is placed on veteran generations now aging and most likely to be seen in end-of-life care (WWII, Korean War, Vietnam). The program also looks organizationally at military benefits and intersections with VA systems and will explore the traditions and sensitivities of grieving families and resources that can assist them.
